

If you're publishing content online, tracking how it performs isn't optional — it's essential. The good news? You don't need expensive software to understand what's working. A handful of **free tools** can give you powerful insights into how readers find, engage with, and respond to your content.

Here's a beginner-friendly guide to the best free analytics tools and how to use them.

---

## 1 □ Google Analytics 4 (GA4)

### What it does:

Google Analytics is the gold standard for understanding how visitors interact with your site. It tracks page views, user behavior, time on site, traffic sources, and more.

### How to use it:

Set up a free GA4 account at

<https://support.google.com/analytics/answer/10089681?hl=en>

Once connected to your website, you can explore:

- Which pages get the most visits
- Where your visitors come from (search, social, direct, etc.)
- How long people stay on your site
- Which content converts visitors into subscribers or customers

GA4 also helps you set up **custom goals** — like tracking newsletter sign-ups or product clicks.

## 2 Google Search Console (GSC)

### What it does:

GSC shows you how your content performs in Google Search — including which keywords bring traffic and which pages get impressions or clicks.

### How to use it:

Get started here:

<https://support.google.com/webmasters/answer/7451491?hl=en>

Check your **Performance Report** to see:

- What queries users typed to find your site
- Which pages rank best
- How often people click your links

This tool is invaluable for improving your SEO and spotting opportunities to rank higher.

---

## 3 Microsoft Clarity

### What it does:

Clarity lets you **see** how visitors interact with your content. It provides session recordings and heatmaps showing where people click, scroll, and drop off.

**Why it's great:** It's completely free and privacy-friendly — no data selling, no sampling.

### Get started:

<https://clarity.microsoft.com/>

Use it to discover which parts of your content hold attention... and which lose it.

---

## 4▣ Google Tag Manager (GTM)

### **What it does:**

GTM simplifies adding and managing tracking codes (for analytics, ads, and conversions) without editing your site's code.

**Why it matters:** It keeps your data collection clean and consistent — especially if you're tracking multiple platforms.

### **Start here:**

<https://marketingplatform.google.com/about/tag-manager/>

If you'd like to dive deeper into setup, check Google's official developer guide:

<https://developers.google.com/tag-platform/tag-manager>

---

## 5▣ Google Looker Studio (formerly Data Studio)

### **What it does:**

Looker Studio turns raw analytics data into **visual dashboards** — perfect for reporting or sharing progress.

### **Start here:**

<https://developers.google.com/looker-studio>

You can connect data from Google Analytics, Search Console, and even Microsoft Clarity to visualize trends in one place.

---

## 6 Google Campaign URL Builder

### What it does:

Track how your marketing links perform — whether from email, social media, or ads.

### How to use it:

<https://ga-dev-tools.google/campaign-url-builder/>

It adds UTM parameters to your links, helping you see exactly which posts or campaigns drive traffic.

---

## Putting It All Together

Here's how to combine these tools for a complete, zero-cost analytics system:

1. **Google Analytics 4** — tracks user behavior and engagement
2. **Google Search Console** — tracks SEO performance
3. **Microsoft Clarity** — visualizes user interactions
4. **Google Tag Manager** — manages all your tracking
5. **Looker Studio** — builds easy-to-read dashboards

Each tool complements the others, giving you a full 360° view of your content's performance.

---

## □ Final Thought

Analytics don't just show you what's happening — they reveal *why*. Once you understand how your audience behaves, you can write better, design smarter, and grow faster.

All it takes is curiosity, consistency, and a few free tools.
